System Compatibility Overview

- **macOS 14 (Sonoma):** Not explicitly mentioned in the releases. Office LTSC 2021/2024 and newer tools (designed for macOS 13 Ventura) are expected to work on macOS 14, but please check the official documentation.
- **macOS 13 (Ventura):** Required for the latest Office LTSC 2021/2024 Suite Installer and its corresponding serializers—with native support for Apple Silicon (M1/M1 Pro/M1 Max/M1 Ultra/M2/M2 Pro/M2 Max/M2 Ultra/M3/M3 Pro/M3 Max/M3 Ultra/macOS Sequoia).
- **macOS 12 (Monterey):** Some Office 2019/LTSC installers are built to support Monterey. Look for versions that specify “Monterey” (e.g., minimum 12.0.x or maximum 12.7.6).
- **macOS 11 (Big Sur):** Certain Office 2019 builds and updates are limited to Big Sur.
- **Older macOS Versions:** Office releases for Catalina (10.15), Mojave (10.14), High Sierra (10.13), Yosemite (10.10), and Snow Leopard (10.6) are available for legacy systems.

Troubleshooting & Tutorials

Troubleshooting Tip: If you encounter issues, consider using an Office reset tool. Remove any remnants of previous installations by checking directories such as:

- `~/Application Support/`
- `~/Preferences/`
- `~/Group Containers/UBF8T346G9xxxx`

Then, reboot your Mac, reinstall Office, and apply the serializer.

Tutorial: Remove and Reinstall Office License

1. **Log Out:** Sign out from all Microsoft Word accounts.
2. **License Removal:** Download and run the [License Removal Tool](#).
3. **Activation:** Download and install the appropriate serializer (for example, [Office 2021 VL Serializer](#)).
4. **Reinstall if Needed:**
 - Remove all Microsoft Office applications manually via Finder or use [Ccleaner](#) for a complete uninstall.
 - Reinstall Office using the installer package, then run the License Removal Tool and install the serializer.

Note: The License Removal Tool file is named

Microsoft_Office_License_Removal_2.7.pkg and the serializer is

Microsoft_Office_LTSC_2021_VL_Serializer.pkg .
